Hi Kirsten,

Here's the Part A list from Michigan. I've contacted Illinois again and they let us know they'll get it back soon.

- Chris

Here is the completed list for Michigan. I added a few columns to include the info you requested. This information is the best we have at this time. The Shiras plant just submitted their revised closure plan this week, so I was able to update that information. I also included the Lansing Board of Water and Light - Erickson Station info, even though they may not be subject. They re-built their ash impoundments with composite liners, and I don't know the intended closure date for the impoundments, but the plant is slated for closure in 2025. They are proposing a clean closure.

If you'd like to discuss in more detail, please let me know.
